EDUCATION

Louisiana State University Roger Hadfield Ogden Honors College

Baton Rouge, LA

B.S. in Computer Science (Software Engineering), Minor in Mathematics

Aug. 2022 - Dec. 2025

- **3.83 / 4.00 GPA**
- Dean's list in Fall 2022, Fall 2023, Fall 2024, and Spring 2025; President's Honor Roll in Spring 2023, Fall 2025
- 3rd place Hackathon at LSU (2024); 1st Place Freshmen Hackathon at LSU (2022)
- Relevant coursework: Data Structures, Software Testing, Object-Oriented Design, Database Systems, Software Engineering, Multicore Programming, Large Language Models, Competitive Programming, Quantum Technology

EXPERIENCE

Full-Stack Engineer | RevenueCat, AppStoreConnect, Google Play Console, AWS

Jan. 2026 – Current

Vigilus

Baton Rouge, LA

- Developed and maintained production mobile and web applications across **React Native**, **Next.js**, and cloud-backed systems in a fast-paced startup environment.
- Implemented subscription infrastructure and mobile billing workflows using **RevenueCat**, **App Store Connect**, and **Google Play Console** across **iOS and Android** platforms.
- Contributed to deployment, testing, signing, provisioning, and release-management workflows for **cross-platform mobile applications**.
- Built and refined frontend and backend-integrated features involving authentication, admin tooling, operational workflows, and client-facing systems.
- Collaborated across the full stack while balancing rapid iteration, maintainability, and production operational concerns.

Student Researcher | Python, C, Git

Aug. 2025 – Dec. 2025

LSU Intersectional AI and Security Lab

Baton Rouge, LA

- Laid groundwork for a new framework in **neuromorphic computing**, a novel paradigm in AI.

Frontend Engineer Intern | React, React Native, Next.js, Vue, TypeScript, Git, Jira, Element

Nov. 2022 – Dec. 2025

Vigilus

Baton Rouge, LA

- Contributed to the development of production web and mobile applications by building, refactoring, and delivering frontend features used by **thousands of clients**.
- Delivered cross-platform **BeautyFindr app (iOS/Android)**, enabling **850+ bookings** by connecting stylists with clients.
- Built frontend features for **Trace Security web app**, a tool designed to streamline and improve accuracy of security compliance audits for large enterprises, improving accuracy and reducing manual effort.
- Developed admin site features for Parking Zen Go, used by facilities **serving thousands of users**, including workflows for managing capacity and resources.

Student Researcher | Python, NumPy, Pandas, NetworkX, MATLAB, Git

Spring 2024, Fall 2025

Louisiana State University & Pennington Biomedical Research Center

Baton Rouge, LA

- Spring: Collaborated with the Pennington Biomedical Research Center to explore a low-cost solution for accurately predicting body composition at **1/100th the cost** of DXA scans.
- Fall: Led research project with 5 team members: significant responsibility in coordination, design, and implementation. Migrated existing MATLAB codebase to **high-quality and scalable Python using OOP**, reducing lines of code to **1/2th** baseline.

PROJECTS

The Social App | React Native, Expo, TypeScript, RevenueCat, Firebase Cloud Messaging, AWS

Jan. 2026 – Current

Vigilus

Baton Rouge, LA

- Developed a cross-platform social mobile application with a focus on subscription infrastructure, push notification systems, and production deployment workflows across iOS and Android.
- Implemented RevenueCat-based subscription and entitlement systems, including App Store Connect configuration, Google Play billing integration, sandbox testing, and internal release workflows.
- Built Firebase Cloud Messaging infrastructure for push notifications and backend-integrated mobile communication workflows while handling signing, provisioning, deployment, and operational mobile engineering concerns.

TigerTracksAI | Next.js, TypeScript, TailwindCSS, Python, Flask, OpenAI API, PostgreSQL, Docker, Git

Fall 2024

LSU Foundation

- Helped plan and develop TigerTracksAI, a tool that automates tedious constituent research, profiling, and outreach for the LSU Foundation.
- Improved team efficiency by prototyping the UI with **Gradio**, created an intuitive and modern UI using **Next.js**, **ShadCN**, and **TailwindCSS**, scaffolded **Python OpenAI API** logic, helped coordinate full stack using **Docker**, implemented client-server communication with **Axios** and **Flask APIs**.
- Presented project to **100+ representatives for 20+ businesses and corporations**.

(See next page...)

Pennington Biomedical Research & Dxter | *Python, NumPy, Pandas, NetworkX, Git*

Spring 2024, Fall 2025

Louisiana State University & Pennington Biomedical Research Center

- Collaborated with Pennington Biomedical Research Center to develop a **cost-effective alternative** to traditional DXA scans for analyzing body composition indices, expediting diagnostic efficiency. In Spring, we implemented the prediction algorithm. In Fall, we refactored the backend from decade-old MATLAB to modern Python.
- **Led the development of Dxter**, a fast, and scalable 3D data-processing pipeline using Trimesh to calculate anatomical measurements from meshes.
- Successful hand-off to Pennington and presented on campus to **30+ colleagues** in both the Spring and Fall.

BeautyFindr | *React Native, TypeScript, Git, Jira, Element*

Summer 2023

Vigilus

- Helped develop **BeautyFindr**, a Baton Rouge-based platform connecting stylists with clients across hair, waxing, and other beauty services.
- Built smooth, consistent, and robust authentication, profile, and appointment booking screens using **React Native** and **TypeScript**; refactored tricky booking logic into a scalable custom hook, fixing a blocking bug and delivering a maintainable solution adopted by the team; collaborated using **Git** and **GitHub** to produce **production-ready code**; tracked assignments with **Jira**; and communicated with coworkers on **Element**.
- Deployed successfully with **850+ client bookings** made so far.

TECHNICAL SKILLS

Frontend: Next.js, React, React Native, TypeScript, JavaScript, Tailwind CSS, ShadCN, HTML/CSS, Gradio

Mobile Platform & Distribution: RevenueCat, App Store Connect, Google Play Console, Xcode, Android Studio, Firebase Cloud Messaging

Backend: Python3, Flask, Trimesh, Java, C/C++, Go

Cloud & Infrastructure: AWS Cognito, Firebase Cloud Messaging, Docker

Databases: PostgreSQL, Firebase Firestore, Strapi

Machine Learning & Data: PyTorch, NumPy, SciPy, Pandas, Matplotlib, NetworkX, MATLAB

Tools & DevOps: Git, Docker, JUnit, Unittest, PGAdmin
